Work Experience

Traya Health. *Front End Developer*

Bangalore | Dec 2023 – Till Date

Traya is a hair health platform that merges Ayurveda, dermatology, and scientific diagnostics for personalized treatments. With a 93% efficacy rate and over 800,000 customers, it provides holistic solutions to improve hair health through nutrition and medical expertise.

Projects

CRM. App/ *React, React Router, Zustand, API, Ant Design*

Dec 2023 –Till Date

- Developed a comprehensive CRM platform for Traya, creating data-driven interfaces that streamline internal workflows and centralize customer interactions through a modern, responsive web application. The project focused on enhancing operational efficiency and team performance management.
- Utilized Zustand for efficient state management, reducing render cycles and improving performance.
- Implemented React Router for seamless navigation and fast, optimized dashboard experiences.
- Leveraged Ant Design for consistent, responsive UI, cutting development time by 40% while maintaining design integrity.

Mool.App / *Next js, Tailwind CSS, Server-Side Rendering*

Aug 2024-Oct 2024

- Developed a dynamic product landing page for Traya's gut health test, offering a seamless user journey with personalized supplement recommendations.
- Optimized performance with Next.js server-side rendering, reducing page load time by 40% through efficient client and server-side rendering.
- Built pixel-perfect, cross-device UI using Tailwind CSS, ensuring flawless user experience across mobile, tablet, and desktop.
- Engineered a personalized recommendation system for tailored gut health test experiences and interactive content.
- Utilized Next.js, Tailwind CSS, and React to create a high-performance, responsive website with intuitive navigation and fast user interactions.

Cortex Consultancy

Chennai | Sept 2021 – Feb 2023

Hired IT Talents for product and service based MNC Clients which involves database handling and end to end recruitment.

Technical Skills

Languages/Frameworks: JavaScript, ReactJs, HTML, CSS, Bootstrap, Tailwind CSS, Material Ui,Ant Design

Developer Tools: VS Code, Git, Babel, Webpack, Postman

Technologies: Redux Toolkit, Zustand, Firebase, REST API

Achievement

Open-Source Contribution - Sanchay-ai-frontend

Jan 2024

Contributed to an open-source project, enhancing user authentication to restrict access to protected content. Developed a tool to extract key video elements (transcription, subtitles, chapters) for organized, easy access. Successfully merged [PR #6](#), resolving [authentication issues](#) and improving security.

Personal Projects

MovieFlix. App/ *React, React Router, Firebase, Redux, API*

[Live](#) 

- Developed immersive movie platform like Netflix, boosting user engagement and exploration. Engineered secure user authentication via Firebase, enhancing project security and enabling personalized content rendering with TMDB API integration. Designed interactive movie selection, presenting relevant videos for each choice, and ensured efficient data management with Redux Toolkit.

XpensTrac.App / *React, React Router, Firebase, Google Authentication, Toastify*

[Live](#) 

- Developed Expense tracker with Context API for smooth data flow. Enhanced security and user experience with Firebase backend integration, Toastify notifications, and React Bootstrap for mobile responsiveness.

Shopee.App / *HTML, CSS, JavaScript ,API*

[Live](#) 

- Developed user-centric app with features include seamless product exploration, filtering, cart management, and billing. Implemented real-time product updates via asynchronous functions for dynamic data retrieval.
